aqua-internal filter XL

Safety

1. Read instructions carefully before use.
2. Only suitable for indoor use.
3. Ensure voltage shown on the label match to the mains supply voltage.
4. Never let the filter run dry, keep it submerged at all times.
5. Disconnect the pump from the mains supply before any maintenance can be made to the pump or aquarium.
6. If the supply cord becomes damaged it cannot be replaced; the whole unit should be replaced.

Installation

1. Rinse the filter housing and filter cartridge with clean tap water before installing it in the aquarium.
2. Fit the suction cups on the rear of the filter housing. Place the filter in the aquarium and use the suction cups to attach it firmly to the side of the aquarium.
3. Make sure that the pump is completely submerged and located at the correct height (see Fig.1).
4. Turn on the filter by plugging the cable into a mains socket.

For superior filtration, crystal clear water and the prevention of algae growth, try the aqua-internal crystal clear filter cartridges, also available at Maidenhead Aquatics. Aqua-internal crystal clear filter cartridges include filter foam, Zeolite, Clean Water, Norit Active Carbon and Colombo Active Alumina and remove all colouration, ammonia, heavy metals, nitrates and phosphates.

Maintenance

1. The dual-action filter cartridge (Fig.2) contains activated carbon, as well as a foam cartridge, for superior results. Clean the filter cartridge every 1 or 2 weeks by rinsing with water from your aquarium. Never use tap water or any form of detergent.
2. Replace the filter cartridge every month (Fig.3). The carbon in the filter cartridge is no longer effective after this time as it becomes fully saturated.
3. Replacement cartridges are available at your local Maidenhead Aquatics store.

(GB) Recycle Information

The symbol of the barred bin printed on the product means that it must be collected separately from other rubbish when it is no longer operational

The user, at the end of the life of the product, will have to bring it to a proper rubbish collection centre for electric and electrical devices.

Alternatively it can be returned to the seller at the moment they buy a new unit, but only at a ratio of 1 to 1.

The correct refuse collection is environmentally friendly and it helps the recycling of the materials. Any other collection procedure is unlawful and will be subject to the law in force.

Warranty

This warranty is valid for up to 2 years on materials and incorrect construction from the date of purchase.

Only units with a fully completed warranty slip and original till receipt will be valid. You must supply the entire unit with accessories in the event of a warranty claim. We will then inform you on receipt of the product whether the unit will be either repaired or replaced.

We accept no responsibility for damage as a result of incorrect use of the unit. Any breakages of parts not due to defects are not covered by this warranty.
